Caliber Launches Double-Duty Grip Glides for ATV and Snow Trailers

Caliber Trailer Products serves up a very creative solution for people that trailer both Snowmobiles and ATVs.

Grip Glides deliver effective gripping traction for loading ATVs onto tilt trailers. Grip Glides also provide a friction-free glide surface for loading snowmobiles, and they keep the wear bars up off the wet trailer deck.

One set contains 18 pieces, enough for one side of a 10' trailer. Grip Glides are a "four-season" addition to Caliber's well-known line of trailer products (formerly known as PowerMadd).

Caliber's MultiGlides, LowPro Glides, Flex Glides and Trax Mats have been best selling products for our distribution partners for many years. Customers, distributors and dealers all enjoy these products as they make the customer's task of loading and unloading snowmobiles effortless.
