

## Product Update – V-Front Ramp Shield p/n 13404

### Handle Extender Kit for p/n 13408 RSP: \$39.95

Caliber has added an additional Handle Extender kit for all V-Front Trailers that have deck heights above standard 24". Many Trailers that have larger wheels that increase the deck height also increases the steepness/angle on VF Ramps. The extender kit will raise the handles roughly 3" which reduces the ride down angle of the drop. Trailers that have a 2" front lip now can add this adapter kit for utilization of the V-Front Ramp Shield. Kit includes all 4 EPDM Rubber inserts and stainless hardware.
