

CALIBER[®] Marine Slides

Installation Instructions P/N 23033 (Yellow)

HARDWARE INCLUDED:

Qty	Description
10	15" Long Marine Slide Sections
1	30 Pack of Stainless Steel Screws

TOOLS REQUIRED:

Electric or Battery Operated Power Drill
Phillips Head Drill Bit
Tape Measure
Marker

- Step 1:** Inspect wood bunks for any sign of wear or rot. Check metal bunks for signs of fatigue or rust. If in doubt, be safe and replace the wood or metal. **CALIBER** is not responsible for integrity of your trailer bunks.
- Step 2:** Carpet does not have to be removed from trailer bunks, but can be removed and discarded if badly worn. New carpet can be reinstalled before Marine Slides are mounted, if only for aesthetic qualities.
- Step 3:** Position Marine Slides on trailer bunks with the washout channels up, and in desired configuration to equally disperse watercraft weight.

HELPFUL HINT: Set drill speed at the minimum torque setting required to install Marine Slides. Excessive torque may cause screw to pull through Marine Slide.

- Step 4:** Install one screw in each washout channel 1" from each end of the Marine Slide. Also place one screw in each washout channel directly in the center of the Marine Slide, 7 ½" from either end. **Be sure screws are countersunk and will not come in contact with your boat.**

CAUTION: When unloading boat, do not remove winch line until trailer is backed into final unloading position.

WARNING: This product is designed to reduce the resistance created when loading and unloading boats and personal watercraft from the trailer. Surfaces are slippery, especially when wet, and caution should be taken when walking or climbing on any trailer deck with Marine Slides installed. Marine Slides may not work in every application without causing damage to some watercraft due to the many different trailer and watercraft designs that exist. Contrary to popular belief carpeted bunks do harm your boat's hull! Carpet when not washed out on a routine basis holds sand and other debris that scratches your hull. This problem may go without catching the owner's attention. Carpet is great for the dispersment of hull material, so a person may never notice their hull has scratches. Look for any hull material on your marine slides after installation and use. If your marine slides have material on them it is a good indication that your boats hull was scratched before you put the marine slides on. Marine slides are not perfect for every application. If you have any questions please call CALIBER at the number below. Pay careful attention to damage during the use of Marine Slides to determine if they will work for your application. **The hull of the vessel needs to be washed and waxed before the marine slides are installed and once a year thereafter. Failure to do this may result in hull damage!**

Congratulations! You are now ready to enjoy your Marine Slides for many years to come!

CALIBER, INC. LIMITED LIFETIME WARRANTY

Caliber, Inc. warrants that this product will be free from defects in material or workmanship under normal use, installation and service. Caliber, Inc. reserves the right, before having any obligation under this limited warranty, to inspect the damaged Caliber product. All warranty shipping costs for inspection shall be borne solely by the purchaser. This limited warranty is non-transferable.
